

ACCESSING SOUTHERN CALIFORNIA EDISON CUSTOMER ELECTRICAL USAGE DATA

Your electrical usage data is critical for the proper sizing of your solar installation and the evaluation of energy efficiency measures. The data which you will download is your usage for every 15 minute interval for the past year. From this we will get you time of use, and your peak demand data. Your solar contractor can then design a wholistic system which will minimize your electrical costs and give you the highest return on your investment.

Please follow these steps to download your usage data from SCE

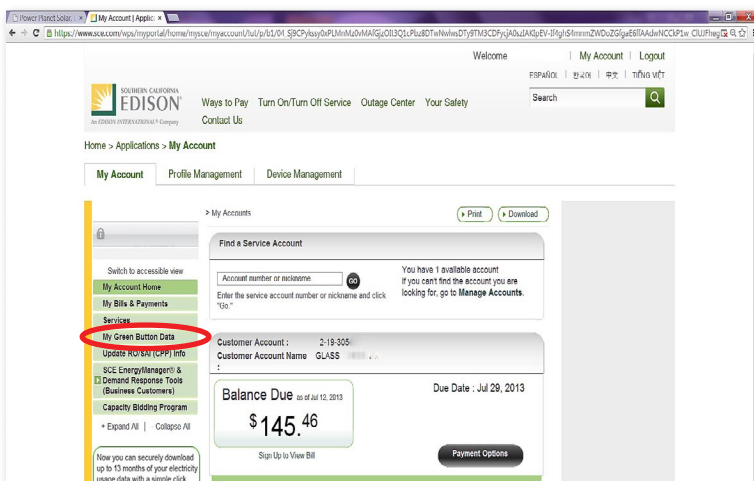

Step 1.

Goto www.sce.com and logon to your account.

If you Do Not have an account please register.

- Click on the **SCE Registration Link**
- Type your e-mail address
- Choose a password
- Enter your customer number and zip code. Customer number is on top right corner of bill, page 1, for example 2-19-305-xxxx
- Accept Terms and Conditions and **Submit**

Step 2.

From the “My Account” page, select “My Green Button Data”

Power Planet

sales@demandcharge.com

My Green Button Data

Use this screen to download up to 13 months of your most recent historical interval usage data (if available).

1) Select the start date and end date for your download
 2) Select the file format
 3) Select your Service Account
 4) Click on the Download button

a Select Date Range: From: 07/01/2012 To: 06/30/2013
mm/dd/yyyy mm/dd/yyyy **Reset**

b Download Format: Comma Separated (.csv) **Download**

NOTE: If you select "XML Format" please click "SAVE" when your browser prompts you to do so.

Your download will contain interval usage data that is currently available for your selected Service Account. Based on how our systems process and categorize usage data, your download may contain usage data of the following types: actual, estimated, validated or missing.

Select Account To Download

Customer Acct#	Service Acct#	Service Acct Address	Rate
<input checked="" type="radio"/> 2-19-305-90	3-027-3108-	FENDER AVE STE A FULLERTON CA 92831	GS-1
<input type="radio"/> 2-19-305-90	3-027-3109-	FENDER AVE STE A FULLERTON CA 92831	GS-1

c

Step 3.

a. From "My Green Button Data" page select the Date Range. Select the most recent full 12 months.

Example 7/1/2012 thru 6/30/2013

b. Select "Download Format"
"Comma Separated (.csv)"

c. Select the "**Service number**".
 This is the meter for which you want the data. Select and download one at a time.

NOTE: Sometimes the website has problems and you must click the back arrow and try again.

Step 4.

Save the file to your computer.

Step 5.

E-mail the file to your Solar Contractor, or Energy Consultant for analysis.

Thank You!

From this data an analysis of you **demand load duration** will be performed which will tell us how often and when you are reaching high levels of electrical demand, and a strategy for **demand control** will be developed. The time of use data will be used to calculate solar sizing, and for determining the most cost effective rate schedule. Additionally we can determine if you will benefit from some of the many utility incentive programs available.

Download the data today and get started saving money.
